Sage Timeslips Feature Comparison (Versions 2016, 2017 and Premium)

Features and Enhancements	Description	Premium	2017	2016
Quick Bill	Sage Timeslips Quick Bill functions provide the ability to create or select a client, created time and expense slips, choose the appropriate taxes to apply and pay the invoice in full in one centralized location. The function is perfect for getting clients in and out of the office fast. Quick bill also offers the option of selecting existing bill layouts, preview of the bill and either printing or e-mailing the invoice or both.	X		
Customer Calculated Fields on Invoices	The same great feature of creating customer calculated fields on Sage Timeslips reports is now available on client invoice cover pages and on client invoices. Offering business specific billing information to your client yours to customize and include on all of your billing.	X		
Firebird Database (SQL)	New SQL like database platform that will improve overall performance and speed (in some cases 5X faster than prior Sage Timeslips applications), especially in networked environments with a large number of user. Database will also be more resilient to corruption due to network transmission outages or latency.		X	
Re designed Accounts Receivable Entry/List	Accounts Receivable Entry/List now displays more vital data eliminating the need to search and run reports to obtain. The new entry window has been reconfigured to provide easy to read and research billing processes.		X	
Re designed Billing Assistant	The redesigned billing assistant provides an updated list view of all or selected clients for fast and accurate verification of data for quick invoicing. The improved layout of the Billing Assistant gives a true "at a glance" view of all billing details. Speed and performance of the Billing Assistant and functionality is improved also.		X	
Re designed Budgets	Sage Timeslips Budgets have taken on a new look and feel. Establishing client specific budgets can be done quickly and easily. This re design provides simplified setup and management. Calculating budgets is now several times faster and can be quickly duplicated for multiple client use.		X	
Re designed Client Information	The Client Information dialog box has been redesigned so that related fields and options are grouped better, navigation controls are more consistent throughout Sage Timeslips, and saving and retrieving of some information is faster.			X
Client Secondary Address Field	On the Client Information dialog box, the Contact Info page now contains additional fields for a second address.			X
Generating Receipts for Payments	You can now confirm that you received a payment from a customer by generating a payment receipt. Receipts are available for payments, reverse payments, payments to account, and payments from account.			X
Printing Watermarks on Draft Bills	During your typical bill cycle, you may print preview drafts of your bills, before all charges are ready to send to your clients. When printing a draft bill run, you can include watermarks on the bills to indicate they are draft bills. Draft bills cannot be approved. When you print draft bills, you will not be able to put them in Proof Stage, approve them, or email them. To approve the bills, you will need to show full descriptions and exclude watermarks for the bill run.			X
