

## Sage Timeslips Obsolescence Policy

The Sage Obsolescence Policy is to support the current Sage Timeslips product release and, unless otherwise indicated below, one prior release of the Sage Timeslips product. Product support includes live customer support and compatibility with other add-on products or services offered, including connectivity with Sage Timeslips eCenter. Sage will only support an obsolete product until a customer's Sage Business Care plan<sup>1</sup> for that product expires.

**If you are using an obsolete version of Sage Timeslips, we urge you to upgrade to the most current release in order to be eligible for customer support and to be compliant with new operating environments.**
